

## Air handling unit *Albatros* **S15 R**

- Flexibel – impossible to order incorrectly
- Compact – access through 80 cm wide door
- Energy efficient
- Low noise level

**Full flexibility. Easy adaptation to different applications.**

The unit is delivered as a right hand model but can very easily be changed into a left hand model on site. Heater battery (electrical or water) is supplied separately and can easily be fitted/changed at site. This ensures safe, fast delivery and cost savings at possible changes in project or mistakes when ordering.

**Fast delivery.**

Flexit S15R is produced against stock and will consequently have a very short delivery time.

**Energy efficient with low noise level.**

The unit is energy efficient and fulfills demands set in building directive TEK10. In addition the unit has a very low noise level.

**Easy access into buildings.**

The unit is compact and can be transported in through an 80 cm wide opening.

Sound data is given at sound power level  $L_wA$  in the capacity diagrams and is corrected with the table for the various octave bands. Radiated noise produces  $L_w$  in the various octave bands and total  $L_wA$ . Radiated noise is calculated by taking the noise value from the supply air table and deducting the total value from the correction factor table. Data for supply air is measured in accordance with ISO 5136, the "In-duct method". Radiated noise is measured in accordance with ISO 9614-2. Brüel & Kjær measuring equipment, type 2260.

### Curves in diagram:

Blue: Air volume in different capacity setting in %.  
Green: Power consumption in Watt, read the scale to the right.  
Red: Sound - indicate sound level  $L_wA$ .
