

## FBE Trolley

FBE  $\varnothing$ 100,  $\varnothing$ 125 og  $\varnothing$ 150

GEOVENT FBE Trolley used in garages where you need an easily adjustable holder for the extraction and in cases where the vehicles have exhaust in the side or rear. The nozzle mounted on the trolley is simply pushed right up to the exhaust.

With the FBE Trolley you get an easy and flexible solution with a mouthpiece spiral pipe that can be easily adjusted in height to match that of the exhaust pipe.

FBE Trolley is well suited for use with emergency vehicles, as it is equipped with a plate that acts as a deflector plate in need of a quick relief.

The vehicle simply pushes the Trolley, which then runs to the side so you do not have to remember to detach it yourself.

### Trolley.

Art. No.	Description
06-250	FBE trolley $\varnothing$ 100
06-251	FBE trolley $\varnothing$ 125
06-252	FBE trolley $\varnothing$ 150
