

Exhaust fumes

## Hose Reels GTE and GTS

5, 7½ m or 10 m in ø80 – ø250 mm

The strict requirements to a healthy work environment in the workshop demand the use of local exhaust ventilation. For this purpose the Geovent Hose reels types GTE and GTS are the optimum choice.

The Geovent Hose Reels, types GTE or GTS, are used for extraction of exhaust gases, welding smoke etc. The advantage of using this principle, is that an extraction hose is always available and rolled out hoses do not take up space on the floor.

Geovent hose reels types GTE (Electric) and GTS (Spring driven) are based on a common platform, so that the Hose Reel (type GTS) can easily be upgraded from spring driven to electric.

We produce the Hose Reels in width 750, 1000 and 1400mm, and it is supplied with hoses ø80, ø100, ø125, ø150, and 250 mm in lengths up to 15m.

The common platform means that we can offer fast delivery, high flexibility, and a high quality product at competitive prices. Please find more information about special editions of the Hose Reel GTE on the next page.

The Hose reel type GTS is provided with a strong steel spring, that works by spring loading in the same way as a roller blind.

The Hose Reel is a sturdy, yet light construction, consisting of galvanized and painted steel parts, which ensures a long service life. A spherical ball bearing gives a trouble-free and easy operation.

The Geovent Hose Reels are practically maintenance-free.

However, the various moving parts have to be controlled for wear and correct mounting regularly.

Geovent Hose Reel in use in a car repairshop.

GTE = Remote control and electric motors  
GTS = Manuel spring driven

Hose reel GTE ø200 mm  
Remote control and electric motors

**Technical data:**

- Galvanized parts: Drum, cover, bracket and all nuts and bolts are galvanized.
- Painted parts: Side panels on the drum are as standard powder painted gray RAL 7015.
- Hose: TPE exhaust hose with nylon spiral. The hose can be crossed to a certain extent. exhaust temperatures up to 170°C, short term 200°C, when used correctly with nozzle and sufficient air from the outside (approx. 50%).
- Special hoses on request.
- For higher temperatures, please see page 5.

**GTS – same data as above, but with:**

The GTS hose reel is mounted with a hanging hose piece so that the hose can be reached by the operator. Note that the GTS-750-10-100 will have a minimum of 2.5 metres of hose hanging down.

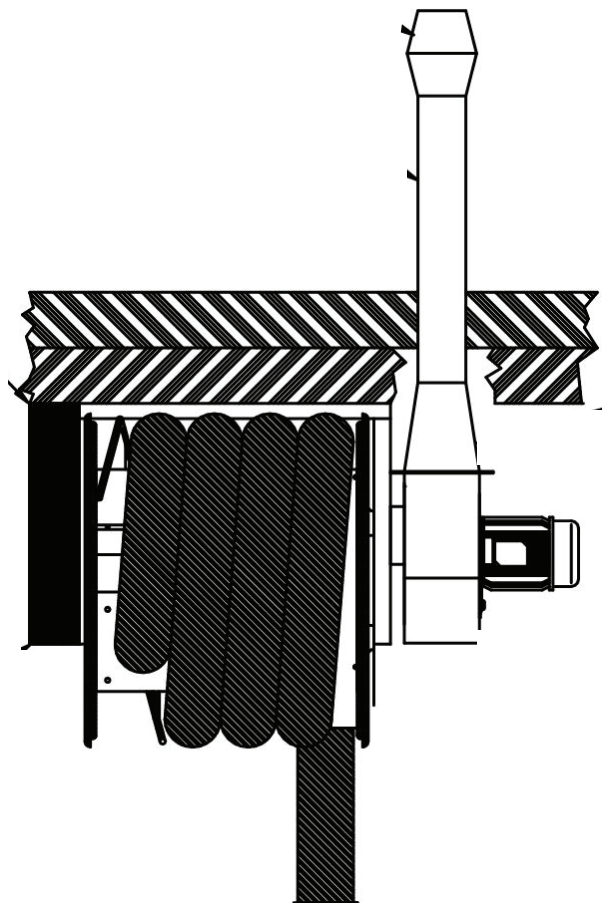

- Heavy duty steel spiral which stands a pulling force of 15 kg. NB: Max. mounting height: min. 5 m.

**GTE – same data as above, but with:**

- Power supply: 230V/50-60Hz.
  - Power Consumption: 170W.
  - Frequency: 433,92MHz.
  - Protection: IP 20 (dry rooms).
  - Lift capacity about 25 kg.
- NB: There may be problems with the control by the remote control due to interference of e.g. overhead cranes.

The remote control transmits on a frequency of 433.92MHz. If other equipment transmits on this frequency, it can significantly reduce the signal.

In such cases, we recommend buying the hose reel with a solution where the remote control and motor transmit on the frequency 868 MHz or a system that transmits on 2.4 MHz, or alternatively to choose a hanging pressure.

**Accessories:**

- Switch for automatic start/stop - 04-293.
- Nozzles - See our large selection.
- All accessories are sold separately.

**Flange fan MSQ:**

The Hose reels types GTE and GTS from Geovent can have a MSQ-200 fan with automatic start/stop of the fan directly connected.

The fan is mounted using a mounting flange and 4 pcs. M8 screws. When the hose is rolled out, the fan starts until the hose is rolled back on to the hose reel. (It requires use of a switch for automatic start/stop. This switch has to be bought separately).

An outlet flange is mounted  $\varnothing 200$  /  $\varnothing 160$  (going from square to round). The exhaust air will be extracted out through the wall or the ceiling. We can supply Hose reel and fan fully assembled - a plug and play solution. In this case you should select a 1 phase (1x230V) fan and a switch for automatic start/stop.

### Pressure drop

### Technical Drawing

GTE/GTS	L	A	B
750 mm	750 mm	980 mm	1031 mm
1000 mm	1000 mm	1230 mm	1281 mm
1400 mm	1400 mm	1630 mm	1681 mm

The drum on a standard hose reel is 1000 mm

### Ordering table

#### GTS

Manual spring operated hose reel incl. hose, ready to be mounted.

04-739	GTE-1700-xx-250 Without hose on reel	-	174 kg

#### Example

- A: Outlet with jet hood
- B: Outlet flange
- C: Fan MSFG
- D: Wall mounting bracket
- E: Start/stop control LWS
- F: Quick turning damper ø160 mm
- G: Hose Reel GTE
- H: Rubber Nozzle

#### OPTIONAL:

Choose a start/stop switch for the fan and the motor damper for automatic start of the fan and open/close of the damper.

Hose reel GTE and GTS - 5, 7,5 m 10 or 15 meter in  $\varnothing 80 - \varnothing 250\text{mm}$

Geovent Hose Reel GTE can be delivered with high temperature hose for up to 650°C.

### GTS High Temperatures 450° or 650°

Manual spring operated hose reel without hose.

#### Ordering table

Art. No.	Description
04-711HT450	Hose reel HT450 without hose
04-711HT650	Hose reel HT650 without hose

### GTE High Temperatures 450° or 650°

Remote controlled hose reel (1x230V, 50Hz) without hose.

Art. No.	Description
04-725HT450	Hose reel HT450 motorized without hose
04-725HT650	Hose reel HT650 motorized without hose
09-132	GeoFlex HT450 $\varnothing 152$ mm per meter
09-163	GeoFlex HT650 $\varnothing 152$ mm per meter
06-330	HT nozzles $\varnothing 150$ with vice grip

Hose reel GTE  $\varnothing 200$  mm with remote control and electric motor

### Geovent Hose reel with 2-button pendant station

Geovent Hose Reel type GTE is available with 2-button pendant station. When ordering, specify the reel size you need and add H after the Ref. No. Eg. 04-760H.

Hose reel GTE and GTS - 5, 7,5 m 10 or 15 meter in  $\varnothing 80$  -  $\varnothing 250$ mm

## Hose reel $\varnothing 250$

Geovent hose reel for hose  $\varnothing 250$  mm is a unique solution with  $\varnothing 250$  mm all the way through the hose reel.

A powerful motor, remote control and a well thought-out design provide efficient and easy operation.

Wireless remote control is included.

Hoses can be ordered separately in length and type as required. Can be used for high-temperature applications such as train exhaust.

Drum, cover and bracket:	Galvanized
Screws:	Galvanized
Side plates:	Galvanized, powder coated grey RAL 7015
Air flow rate:	Q = approx. 2.500 m <sup>3</sup> /h
Connection:	$\varnothing 250$ mm

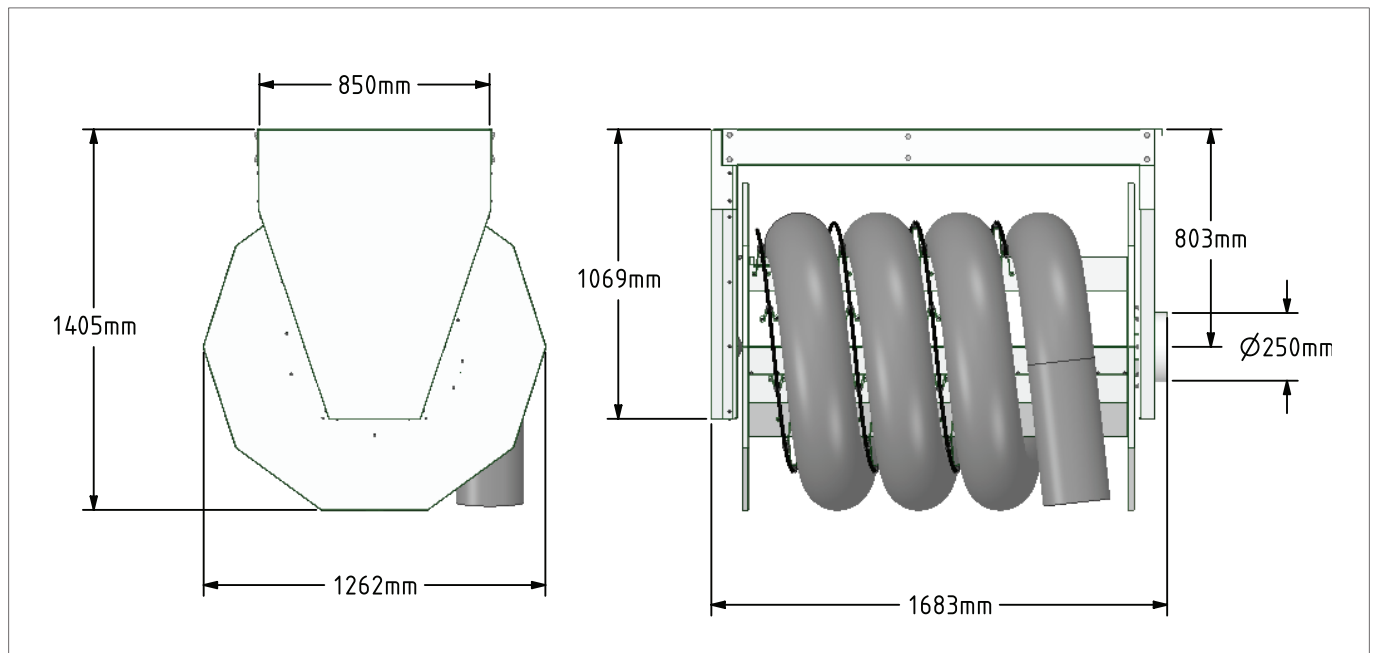

Hose reel  $\varnothing 250$  mm

## Ordering table

Art. No.	Description
04-739	Hose reel GTE-1700-XX-250, without hose on reel
